SUMMARY

Front end developer with a creative and driven mindset. Dedicated to achieving development objectives while producing quality products and design. Eager to continue learning and growing my skill set in a professional setting.

SKILLS

TECHNOLOGIES: *HTML, CSS, JavaScript*
DATABASES: *MongoDB, SQL*
FRAMEWORKS / LIBRARIES: *React, Ruby On Rails*
VERSION CONTROL: *Git*
DESIGN: *Figma*

EXPERIENCE

General Assembly, *Software Engineering Immersive* | June 2021 - September 2021

• *Project 4 - Backend: Created a Ruby On Rails API with full CRUD controller actions. Frontend: Interactive React app utilizing Axios to consume data from the API, and render that data in my components. https://eathesyndicate.netlify.app*

• *Project 3 - Backend: API created with full CRUD using Express, Mongoose, and MongoDB. Frontend: Interactive React app utilizing Axios to consume data from the API, and render that data in my components. https://eaimgnation.netlify.app/*

• *Project 2 - Interactive React app utilizing Axios to consume data from Airtable, GET/render that data in your components, and POST/create new data on Airtable. https://eacrave.netlify.app*

• *Project 1 - Built with HTML, CSS, and JavaScript. Uses Axios to make a request to an external data source and inserts the retrieved data onto the DOM. https://evankaine.github.io/Wayfinder*

NCR, *Customer Engineer*, Brooklyn, NY | February 2019 - June 2021

• *Provide installation, maintenance, and repairs on Financial/ATM and self-checkout technologies.*
• *Ensure high levels of customer satisfaction and continuity of customer operations.*
• *Identify and correct performance issues.*
• *Follow internal procedures for change, escalation, and incident management.*
